

## FAQ's Creation Wallpad Touch

### **Q: What does the Wallpad Touch control?**

**A:** The Wallpad Touch provides the ability to control a number of devices, such as lights, audio, heating etc., depending on what items your control system is programmed to control.

### **Q: Does the Wallpad Touch only work with the Creation On Screen Menu System?**

**A:** It is a 'plug and play' device when partnered with the Creation On Screen Menu, however as it is a Networked device it can be integrated with other control systems that support IP protocols.

### **Q: Can it be placed into a standard back-box?**

**A:** It requires a 35mm back-box which can be a round or square type.

### **Q: How does it operate?**

**A:** It is operated by touching the screen and choosing from the menu of options – it can also be operated using the Bang & Oulfsen Beo4 remote control.

### **Q: How do I use it to operate my lights?**

**A:** A simple tap on the aluminium section of the Wallpad Touch will operate the lights.

### **Q: What cables are required?**

**A:** As the Wallpad Touch is a Power over Ethernet (POE) device it only requires a single Cat5 or Cat6 cable connected to a POE network switch.

### **Q: What colours options are available?**

**A:** The aluminium cover is available in Black, Silver, Gold, Red and Blue. Special colour orders may be possible – please contact us for further information: [info@creation.com.es](mailto:info@creation.com.es)

### **Q: Does the Wallpad Touch react to movement?**

**A:** Yes, the Wallpad Touch has a built in motion sensor which can be programmed to activate certain functions, e.g. to turn on the lights when movement is detected.
